

## Juvenile (Adolescent) Programme for Gouldians

Day of Week	Water Supplements	Seed Supplements
Saturday	KD	Turbobooster, e Powder, F-Vite
Sunday	Dufoplus/Ioford	Turbobooster, e Powder, F-Vite
Monday	Ioford/Megamix	Turbobooster, e Powder, F-Vite
Tuesday	Ioford/Megamix	Turbobooster, e Powder, F-Vite
Wednesday	Fresh Water	Turbobooster, e Powder, F-Vite
Thursday	Fresh Water	Turbobooster, e Powder, F-Vite
Friday	KD	Turbobooster, e Powder, F-Vite

The dosages and instructions described here are recommended for the Juvenile (Adolescent) Gouldian Health Programme. The dosages on the labels of the products are used for birds with illness or nutritional deficiencies.

KD Water Cleanser is prepared by adding 1gm (level white spoon) into a litre of water. The drinking vessel is filled from this litre.

Dufoplus (1ml) and Ioford (2.5ml) are mixed together into 500ml of drinking water and safely left for two days, as they are sugar free. They provide the vitamins and trace elements necessary for good health and vitality. Signs of improved health are visible by an increased noise and activity within the bird room. An increased intensity of plumage color, should be noticed within three weeks of using the products mentioned in this programme.

1ml of Turbobooster is mixed thoroughly into 500 grams of seed or softfood. The Turbobooster provides Gouldians with the fatty acids, protein and minerals necessary for good health and excellent fertility and breeding results. Glossy strong feathers and increased vitality are the health changes you will notice within three weeks of using these products.

F-Vite should be made available in a finger draw continuously.

ePowder should be made available in a finger drawer on days of Turbobooster.

## Molting Season Programme for Gouldians
